DETAILED ACTION***Allowable Subject Matter***

Claims 1, 2, 4-40, 42-58 are allowed.

The following is an examiner's statement of reasons for allowance: The prior art taken either singularity or in combination fails to anticipate or fairly suggest the limitations of the independent claim, in such a manner that a rejection under 35 U.S.C. 102 or 103 would be proper. The prior art fails to teach a combination of all the claimed features as presented in independent claim 1, 28, 32, 47, 51, 52, 55, 58, with the allowable feature being; the LC modulator includes multiple, independently addressable regions for selectively altering the polarization of an incident beam(claim 1); a polarizer between the LC modulator and the reflective element(claim 28); a right angle prism positioned to reflect the beams back through the LC modulator and the birefringent element, wherein the birefringent element recombines orthogonally polarized components of the reflected beam to produce an output optical beam(claim 32); a polarizer positioned between the LC modulator and the reflective element(claim 47); the reflective element is a corner retroreflector(claim 51); the reflective element is a right angle prism(claim 52); a LC monitor coupled to the LC modulator and the controller(claim 55); the LC modulator has a LC layer sandwiched between a pair of substrates each supporting at least one electrode and a fixed retarder layer in series with the LC layer(claim 58). Therefore claims 1, 2, 4-40, 42-58 are allowed.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
